Math Lesson

Grade: First Content Standard: 1.OA.7 Work with addition and subtraction equations. Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true or false. For example which of the following equations are true and which are false? 6=6, 7=8-1+1,5+2=2+5, 4+1=5+2. Materials: Unifix Cubes, four each of three colors and pan balance per pair/table; recording sheet
he equal sign, and determine if equations involving addition and subtraction are true or false. For xample, which of the following equations are true or false. For example which of the following quations are true and which are false? 6=6, 7=8-1+1,5+2=2+5, 4+1=5+2.
xample, which of the following equations are true or false. For example which of the following quations are true and which are false? 6=6, 7=8-1+1,5+2=2+5, 4+1=5+2.
quations are true and which are false? 6=6, 7=8-1+1,5+2=2+5, 4+1=5+2.
Naterials: Unifix Cubes, four each of three colors and pan balance per pair/table; recording sheet
hared Experience and procedure details:
ell children that this (balance) is a tool used in math and science to measure. "Today you are going to
et some time to try using it with these different colored cubes in four ways. Your group can decide
ogether to put the cubes in the pans/cups of the balance however you want. When you choose a way,
ach of you needs to show what you notice in one of the squares on this recording sheet. Each time,
how how you used each different color on the balance.
s students work, listen to conversation related to >,<,= and for opportunities to talk about "equal". Did
nyone use the same combination of cubes on the opposite side of the balance. Turn the balance
round and ask what changed. Ask a lot of "what if" questions.
hoose work that illustrates that equations can be represented/written in either order.
ossible Picture: group working, scale and cubes, list of what the group did
ossible People Talk: explain what they did, talk about what they noticed, possible conclusions
eature Talk: balance/equal, measure, add, compare, more, greater, less, fewer,
ossible Symbolic Representation: equations/representations that show that order doesn't matter.
